

## REMOVING SECTIONS

Want to make sure a section isn't taking up space on your device? **Press and hold on a section**, then press **Remove**, and it's off your device, ready to come back whenever you want.

## OLDER EDITIONS

Remember that great article in the Sunday Post? Now, you can do more than remember.

The Calendar icon brings up all the past editions you can read (up to two weeks old).

**Tap on a date** to see the front page stories of the day, and tap the paper to start reading.

## CUSTOMIZE YOUR SETTINGS

If you want to speed up downloading your paper every morning, you can select sections you don't read very often to only show up when you want them. Just uncheck them in **Settings**, and they'll download on demand when you want to read them.
